#### **Energy issues to consider....**

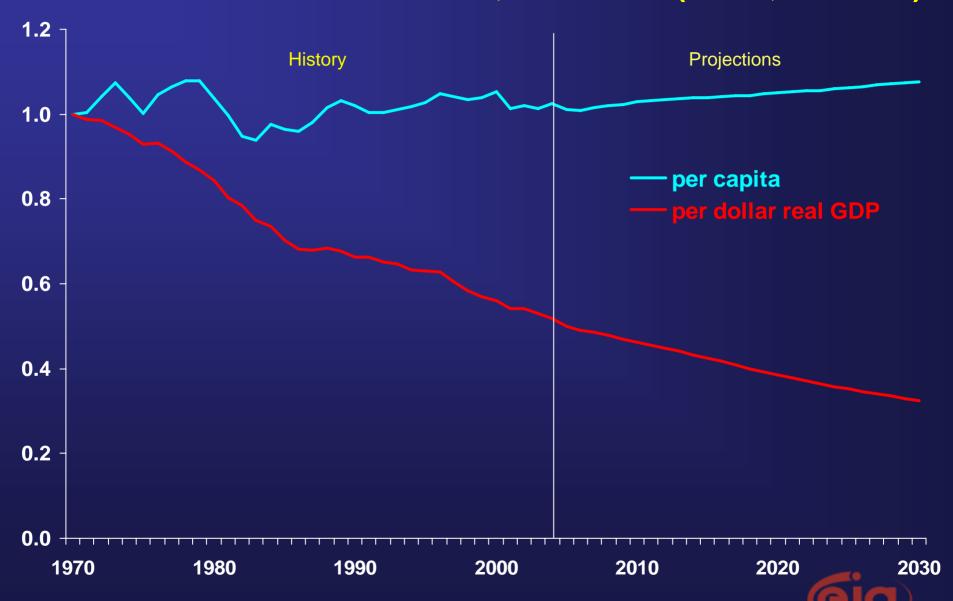

- How are energy trends changing?
- What role will ethanol play in the future?
- How big a contribution can alternative sources of distillate fuel oil, such as coal-to-liquids and biodiesel, make to energy supply?
- What is the role for unconventional vehicle technologies?
- How large of a contribution will LNG make to meeting energy requirements?
- Will coal continue to play a dominant role in U.S. electricity generation?
- What role will nuclear generation play in meeting electricity requirements?

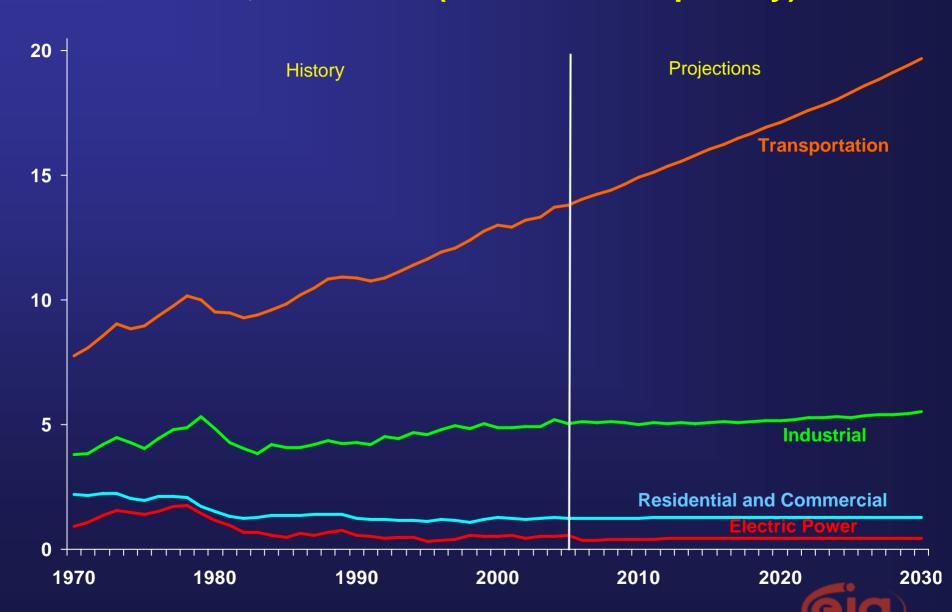

#### U.S. Primary Energy Consumption by Fuel, 1960-2030 (quadrillion Btu)

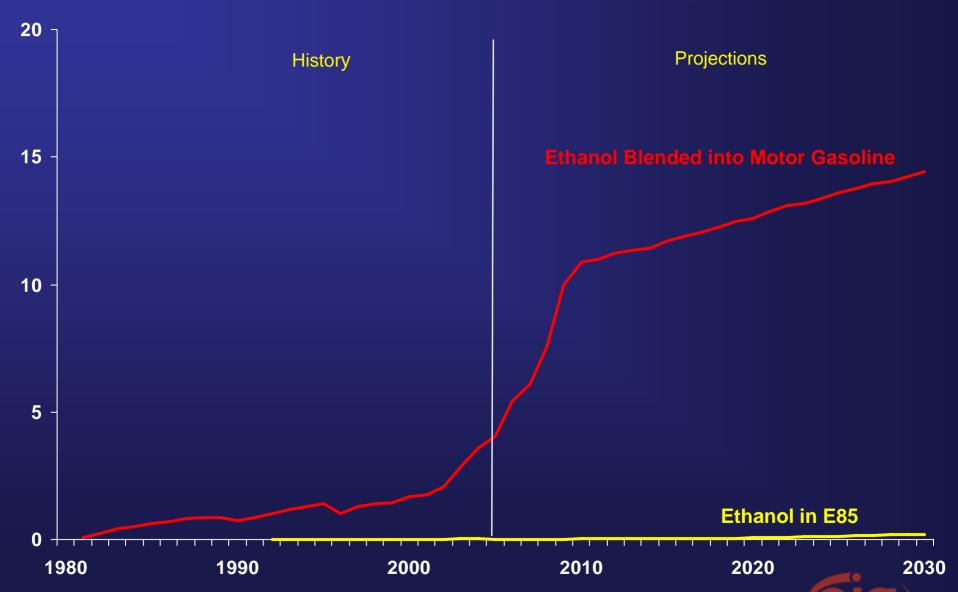

#### U.S. Energy Use per Capita and per Dollar of Real Gross Domestic Product, 1970-2030 (index, 1970 = 1)

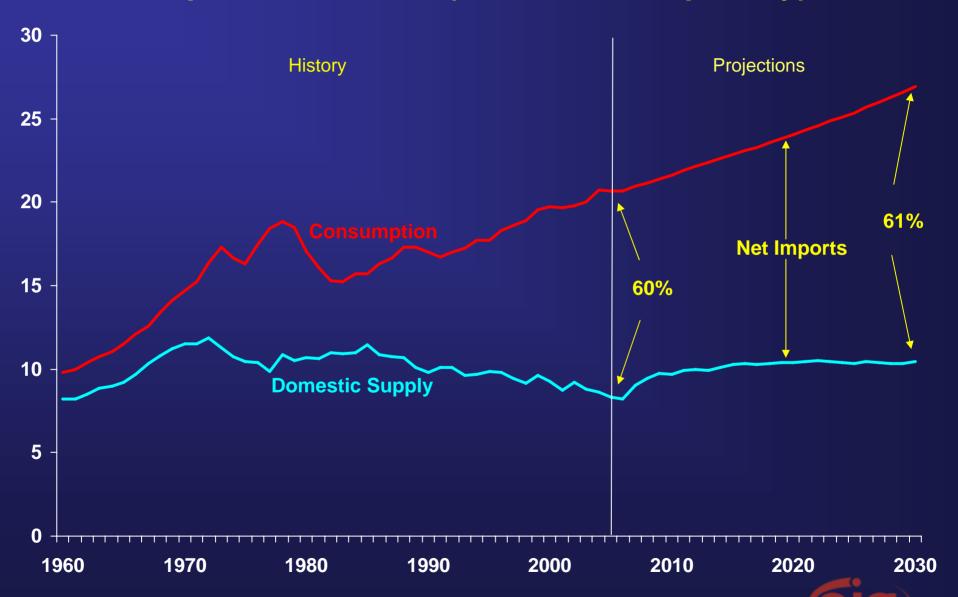

#### Consumption of Liquids and Other Petroleum Products by Sector, 1970-2030 (million barrels per day)

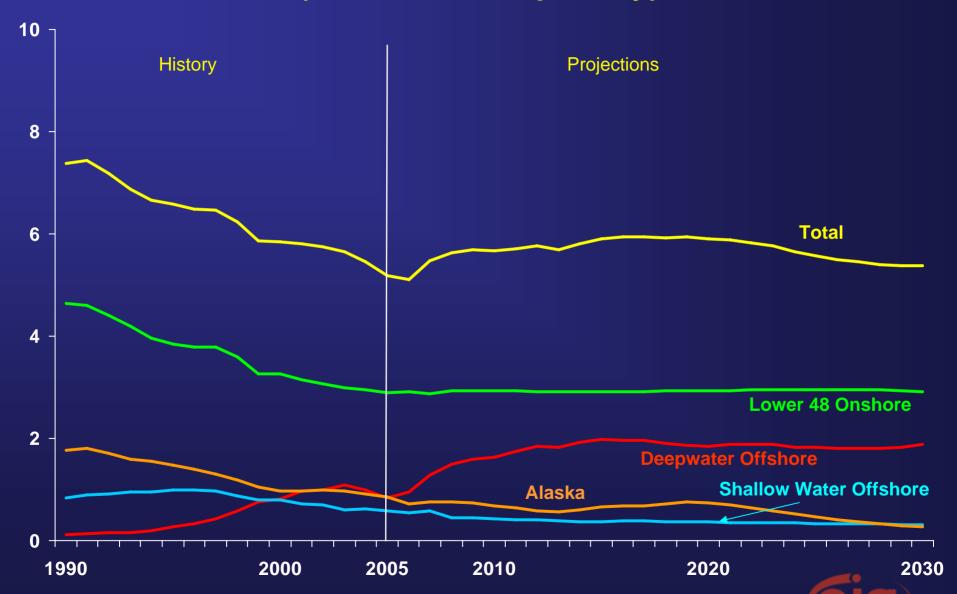

#### **Ethanol Consumption as E85 and Blended with Motor Gasoline, 1981-2030 (billion gallons)**

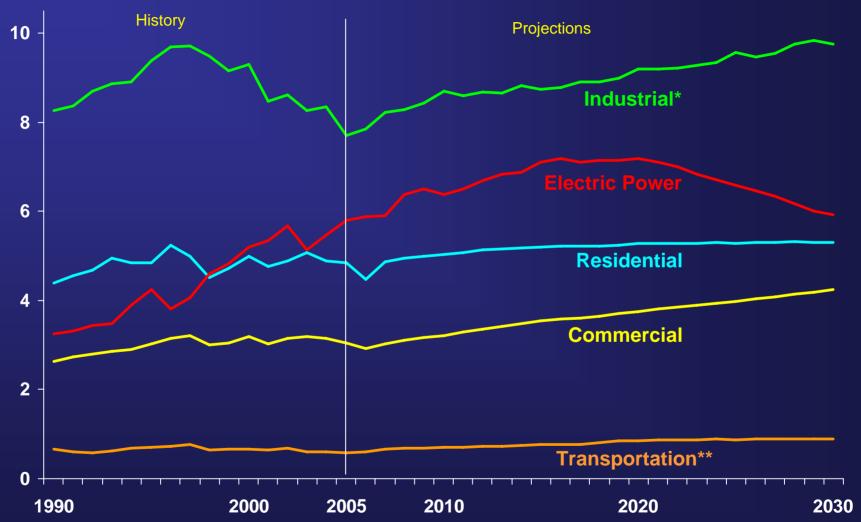

#### U.S. Petroleum/Liquids Supply, Consumption, and Net Imports, 1960-2030 (million barrels per day)

#### U.S. Crude Oil Production by Source, 1990-2030 (million barrels per day)

#### U.S. Natural Gas Consumption by Sector, 1990-2030 (trillion cubic feet)

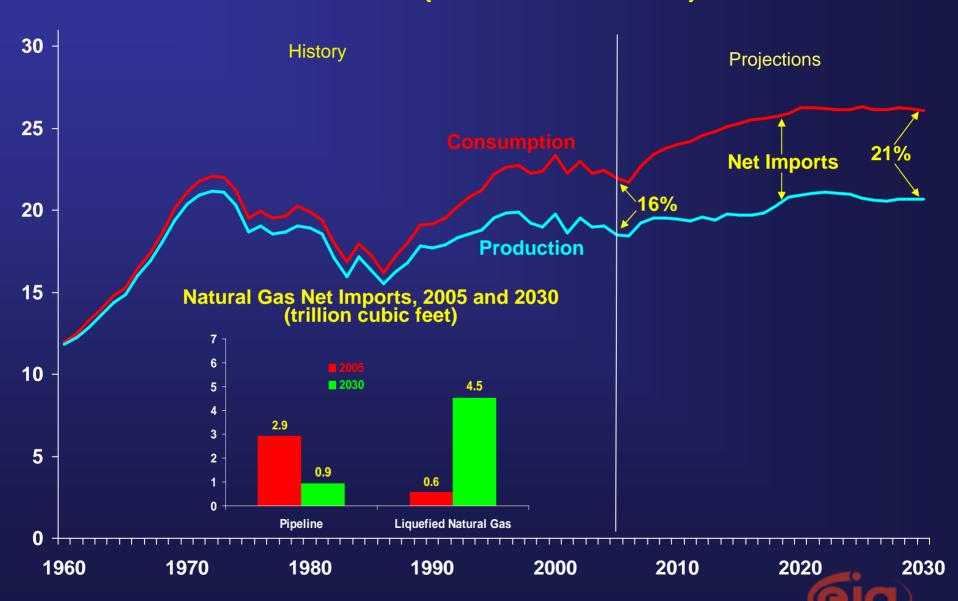

<sup>\*</sup> Includes lease and plant fuel

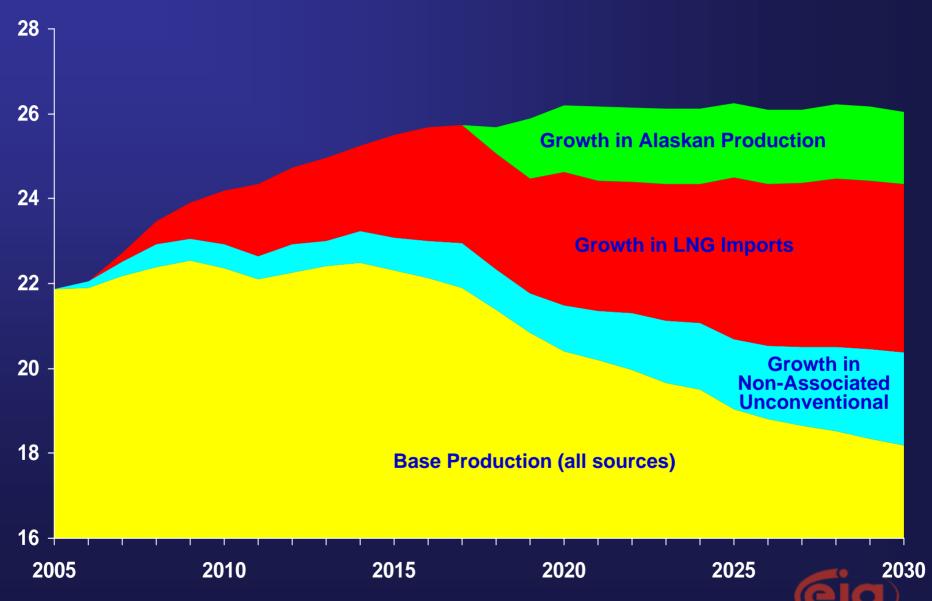

<sup>\*\*</sup> Includes pipeline fuel

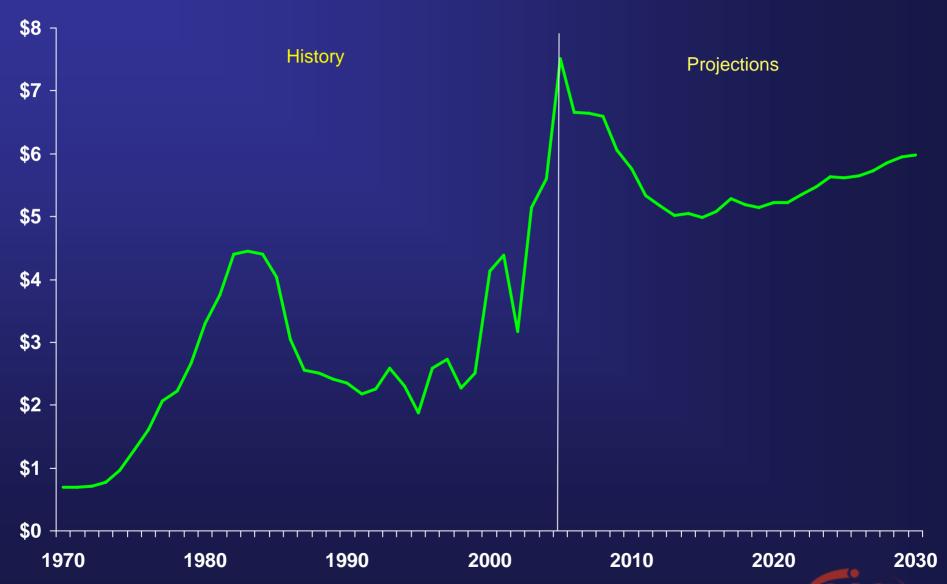

#### U.S. Natural Gas Production, Consumption, and Net Imports, 1960-2030 (trillion cubic feet)

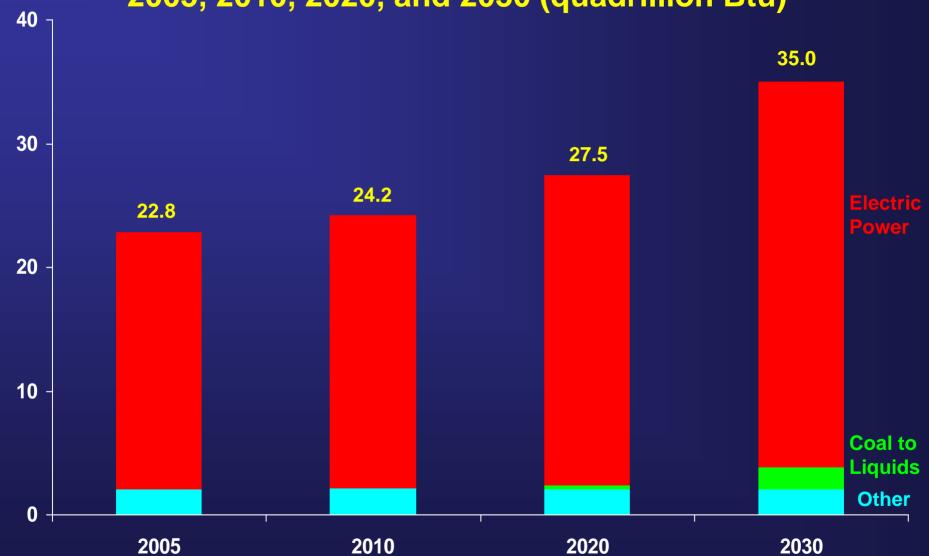

#### Major Sources of Incremental U.S. Natural Gas Supply, 2006-2030 (trillion cubic feet)

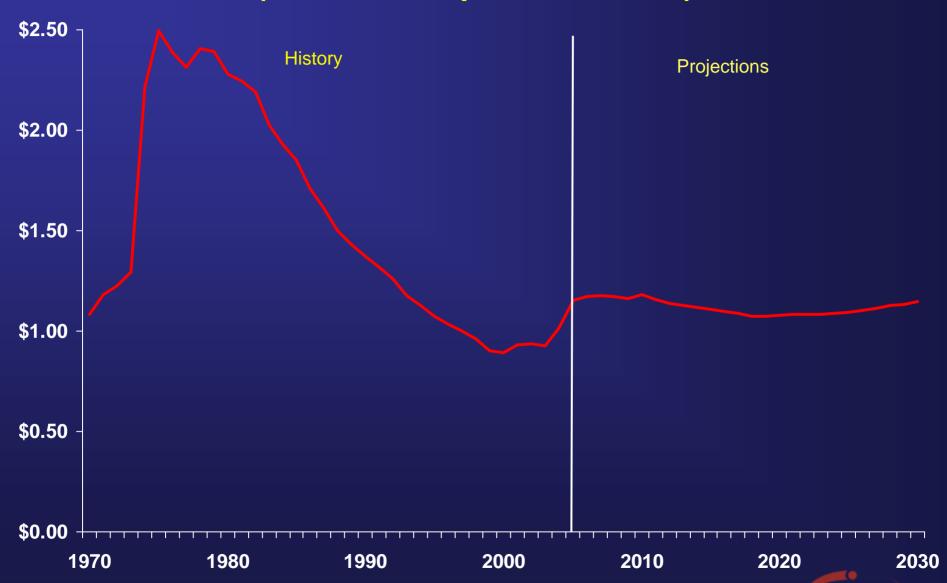

## U.S. Natural Gas Wellhead Price, 1970-2030 (2005 dollars per thousand cubic feet)

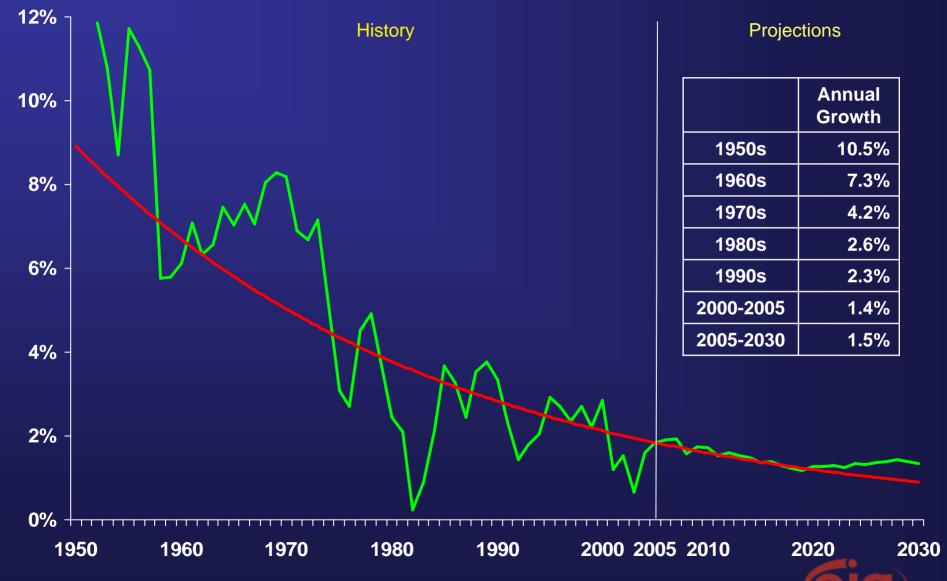

#### U.S. Coal Consumption by Sector, 2005, 2010, 2020, and 2030 (quadrillion Btu)

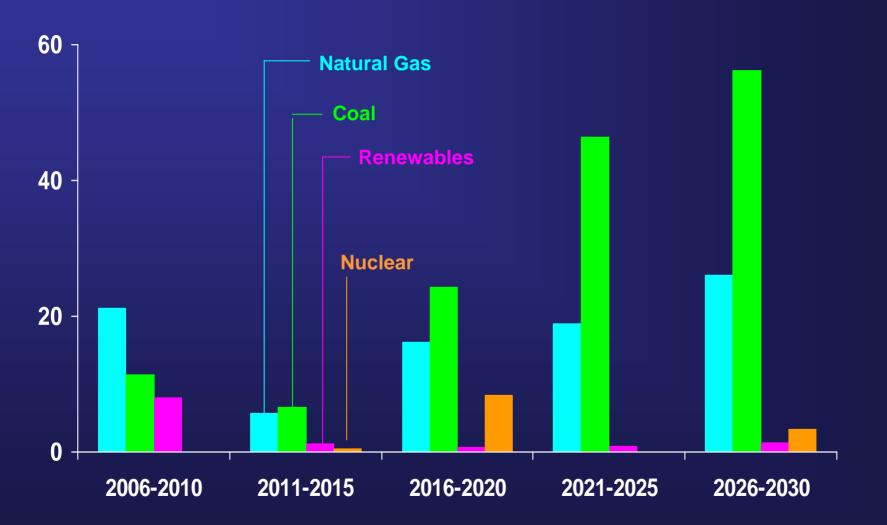

## U.S. Coal Minemouth Price, 1970-2030 (2005 dollars per million Btu)

# 3-Year Rolling Average Electricity Demand Growth (with exponential trend line)

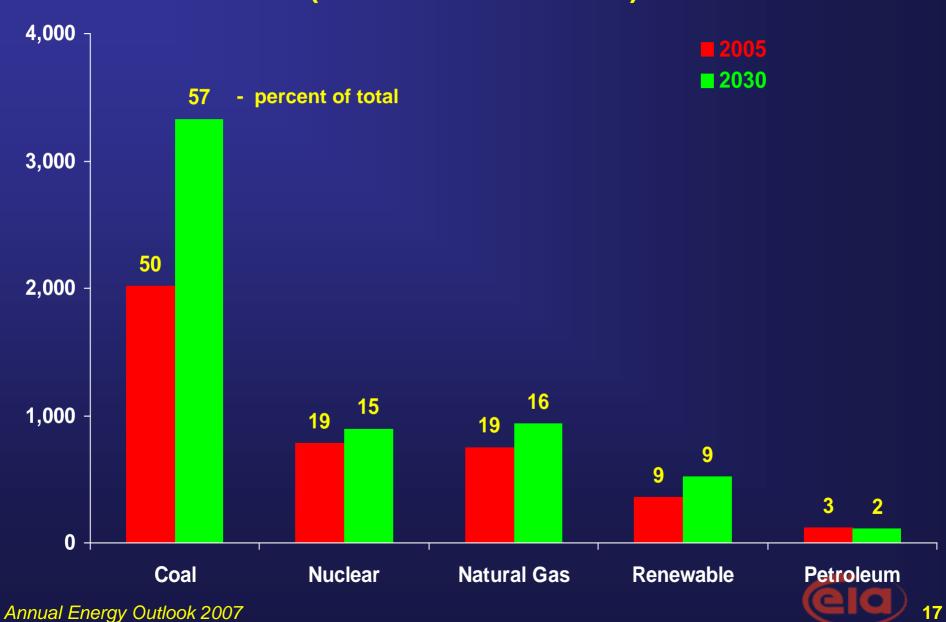

## U.S. Electricity Generation Capacity Additions by Fuel, 2006-2030 (gigawatts)

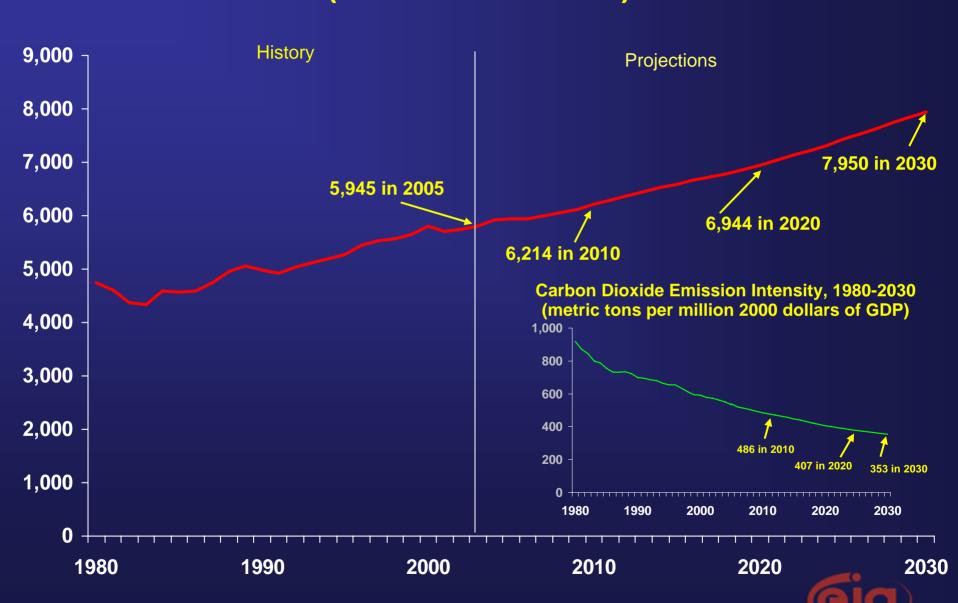

# U.S. Electricity Generation by Fuel, 2005 and 2030 (billion kilowatthours)

#### U.S. Energy-Related Carbon Dioxide Emissions, 1980-2030 (million metric tons)

# Annual Energy Outlook 2007 reference case indicates that through 2030....

- Traditional fossil fuels are expected to continue to meet the bulk of energy requirements over the projection period
- U.S. energy demand is projected to grow at an average annual rate of 1.1 percent
- The energy efficiency of the economy is projected to increase at an average annual rate of 1.8 percent
- U.S. oil import dependence, measured as a share of U.S. oil use, is not expected to increase over the next 25 years
- U.S. natural gas use is projected to be level off over the last decade of the projection
- Future growth in U.S. natural gas supplies depends on unconventional domestic production, natural gas from Alaska, and liquefied natural gas imports
- Carbon dioxide emissions from energy are projected to grow at an average annual rate of 1.2 percent

#### **Periodic Reports**

Petroleum Status and Natural Gas Storage Reports, weekly

Short-Term Energy Outlook, monthly

Annual Energy Outlook 2007, February 2007

International Energy Outlook 2006, June 2006, next issue May 2007

#### **Examples of Special Analyses**

"Economic Effects of High Oil Prices," Annual Energy Outlook 2006

Analysis of Oil and Gas Production in the Arctic National Wildlife Refuge,

March 2004

The Global Liquefied Natural Gas Market: Status and Outlook, December 2003

"Restricted Natural Gas Supply Case," Annual Energy Outlook 2005
